

Secure Development Delivery — [PROJECT]

Version: v1.0 · Date: 2025-02-15

Executive Summary

- Scope: [SCOPE]
- Delivery Status: [STATUS]

Actions This Week

- [ACTION_1]
- [ACTION_2]

Requirements & Architecture

- Functional/Non-functional (security) requirements
- Diagrams, data classification

Implementation

- Stack, modules, API contracts, auth model
- Security controls (validation, authZ, logging, secrets)

Testing

- Unit/integration coverage, security test cases, dependency audit

Deployment & Runbook

- Env vars, migrations, roll-back, observability

Handover

- Repos, CI/CD, credentials, docs index

Warranty/Support

- 30-day defect window, contacts, SLAs

Appendix

- OpenAPI, threat model summary, SBOM
